

VETIVER GRASS SYSTEM FOR LANDSLIDE REHABILITATION WITH HARD STRUCTURE

Dr. Paul Truong
Director, Vetiver Network International
Brisbane, Australia
www.vetiver.org

**Landslide after heavy and
prolong rain at
Pullenvale, Brisbane,
Australia**

**Vertical drop
from road side
of about 10m**

Installation of terraces with star pickets and treated pine boards

Sandbags filled with soil and fertiliser at the end of the gully

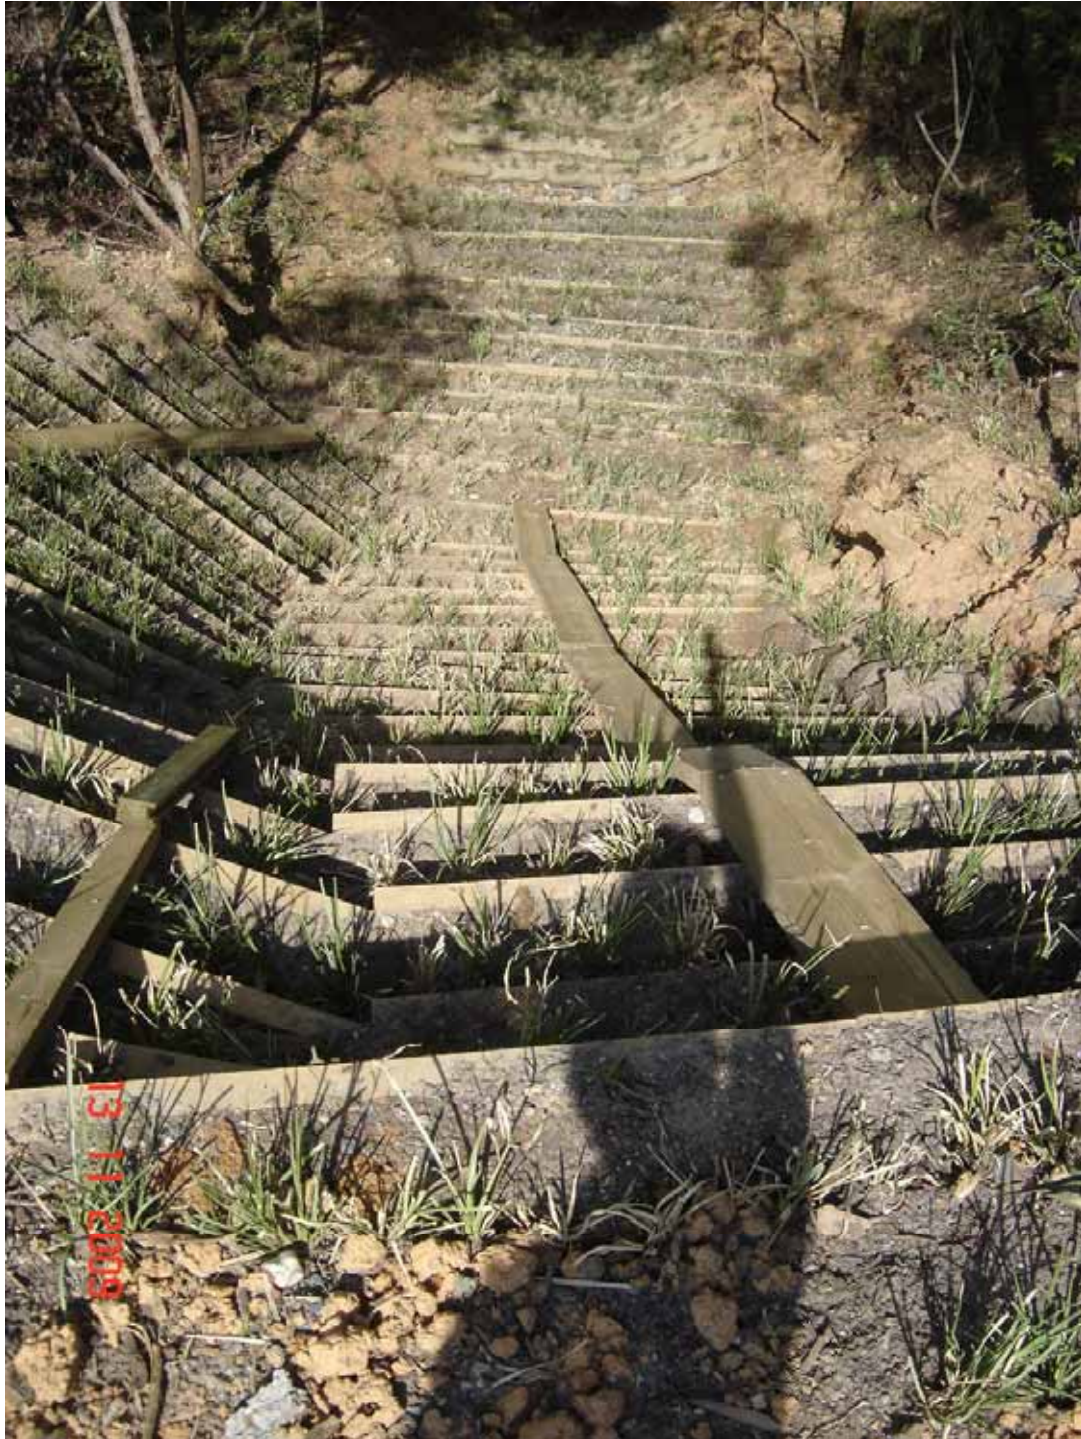

Vetiver planted on the terraces

**Vertical drop
of 15m**

Vetiver roots will eventually grow into the subsoil

Vetiver roots will stabilise these terraces
