

Vetiver Systems application on National Route 1 in the DR Congo

Alain Ndona Email: alinondona@yahoo.fr

Here are the photos of my recent accomplishments with Vetiver System. I was hired as a consultant by a French civil engineering company, that had a contract for rehabilitation of a stretch of about 150km of the RN1. My job was to protect drains, slopes, and embankments using VS.

Alain Ndona is the most experienced Vetiver Systems Bioengineer working in Africa today.
