

VARIETIES

- Comparing roots system of
 - *V. zizanioides*
 - *V. nemoralis* (collected in Central Highland of Vietnam)

Dr Pham Hong Duc Phuoc

Nong Lam University

Ho Chi Minh City

VIETNAM

Left: *Vetiveria zizanioides*

Right: Vietnamese native
vetiver
(*Vetiveria nemoralis* ???)

Harvesting vetiver root system at 10 months after planting

Conclusion:

Ten month root growth

Native vetiver (front): resistant to leaf disease (not showing in this picture); short root system; not recommended for stabilizing road side, river bank ... However, it can be used as hedge row against soil erosion.

V. zizanioides (back): 3.30 m long
